Lahore/Pakistan

SUMMARY

A self-sufficient, quick learner and gold medalist majoring in software engineering at a prestigious institution (FAST-NUCES, Lahore), with proficiency in logic building. My effort and constancy are evident by the fact that my name has been on the dean's list six times in a row. Despite having good academic results and gold medals I also have good programming skill set and logic building techniques. If you assign me a task and I don't know how to do it, I will do research, learn that task and at the end of the day you will find that task completed.

EDUCATION

Software Engineering (3.7/4.0 GPA)

National University of Computer & Emerging Sciences, Lahore
2020 - Present

PROJECTS

HR system

Arrivy Lahore

I with my intern fellows developed a HR system with my intern fellows and successfully changed their current third party HR system with Our HR system. Technology used for this was

- Slack bolt (node.js)
- React Frontend

Edulink

Individual Project

It is a full stack project based on MERN Stack, the main functionalities of this project was to find institutes, Universities and Other institutes have opportunity to list their institute on this website, Online admission test for students and many more

Java photo editor

Individual Project

Worked on java graphics and swing to create an amazing photo editor having functionalities like Edit image (brush, crop, filters), Display and edit image from internet (google image api), Uploading image on social gallery and many more
