Career start with this position & worked with governmental entities to deploy different online systems in Punjab.

Projects

- **As Software Product & QA Manager at The Moon Group.**

- **Bitflex:** Working as QA Lead for the project Bitflex, which is a crypto based exchange to be launched all over the world, while coordinating with Project Management, Software Development, Business Analysis and Client teams. Preparation and implementation of QA Policy while foreseeing QA Teams with respect to planning, training, and executing are my core duties for this project.
- **CryptoJobs:** I am working as QA Lead for the project CryptoJobs which is a speial online job portal for people looking to hire or work in Crypto domain. Overseeing the Product Designing, Development, Testing and Delivery are my core duties.
- **CleverVital, Mondesi, Picaldi, ZumSonnenschein, MS Online Product Sale:** I am working on these E-Commerce based projects as a Product Manager and project planning, estimation, resource management, stakeholders' management and communication are my day-to-day activities. Successful delivery after complete project validation with client requirements is my core responsibility as well.

- **As Software Project Manager & QA Lead at Apoyo Tech.**

- **SunExpress Airline:** SunExpress is a joint venture of Turkish-German based airline that operates mostly in the European Region. I have been working with SunExpress as a Software Project Manager and Lead QA for their newly developed mobile application available for both iOS and Android platforms. Activities included are Client Communication, Project Kick-Off, Requirement Analysis, Project Effort and Budget Estimates, Project Risk Identification and Mitigation, Project Test Design and Testing, Project Delivery and Maintenance.
- **UBL Mobile App:** I have worked as a coordinating partner in Project Management domain for the Usability and Compatibility testing part of UBL Mobile Application. Activities included are Communication with 3rd party Development Team, Test Effort Estimation, Test Execution and Reporting.
- **Bank Saudi Franci:** I have worked as a coordinating partner in Project Management domain for the Requirement Analysis, Requirement Traceability Metrics Development, Effort Estimation and Local Team Handling for Testing of Consumer Portal part of BSF Web Application.
- **Functional & Backend Implementation Tester (For Freight Services as DHL, FEDEX & UPS):** I have been working extensively in the functional and backend testing role to validate different types of functional requirements along with reports and components with actual Database systems. Also, I have been working on preparation of Training Material and Documentation for the team.

- **As Principal Software Quality & Project Associate at Ascertia Pvt. Limited**

- **ADSS:** ADSS is a suite of different services that provides digital signature creation, digital signature verification, certificate validation, long term archive & notary service, time stamping, certification authority and registration authority. I have worked on ADSS as a Quality Assurance and Support Engineer where my activities involved were Requirements Review, Test Designing, Test Execution, Release Support and Client Support. Along with these, I have been extensively involved with demonstration of product to internal and external stakeholders.
- **Signing Hub:** It is a PKI based solution and perfect alternative to the old paper-based approach of manually sending, printing, ink-signing and scanning paper documents. I have briefly worked on this project as a QA Engineer and the activities involved in my role were Requirements Review, Test Designing, Test Execution and Release Support.

- **As Lead Software Quality Assurance Engineer at Code View Camp**

- **Egnatium Strategy:** It is a web-based application of KPI measurement domain from Business perspective. I worked on this project as Lead QA Engineer where my duties involved Requirement Gathering and Analysis, Test Designing, Test Reviews, Test Report Creation and Release Support.
- **Egnatium Experiences:** It is a web-based application of corporate domain with KPI measurement from Employee, HR and Business perspective. I worked on this project as Lead QA Engineer where my duties

involved Requirement Gathering and Analysis, Test Designing, Test Reviews, Test Report Creation and Release Support.

- **As SQA and Business Analyst at Probase Apps Limited**

- Tested Multiple ERP and Web Application projects for number of clients.
- Worked on both Web and Mobile Applications.
- Had multiple Requirement Gathering sessions with Clients and internal Stakeholders as a BA.

- **As Trainee Engineer (Project Associate) at Punjab IT Board**

- **Punjab Youth Internship Program (PYIP):** PYIP was a project launched by Government of Punjab, Pakistan where a network of fresh graduates from the whole province were provided with internships in different governmental departments based on their academic records and qualification. A complete backend system was developed by PITB for management of applicants and their further postings. I was part of the team which developed the system as a Project Associate and my duties included were Requirement Analysis, Project Documentation, Project Test Designing and Project Reporting.
- **E-Learn:** E-Learn is an initiative of Government of Punjab, Pakistan which is a web and mobile application-based collection of curriculum and teaching material. I was part of the project team whose duties involved Requirement Specification, Test Designing, Test Execution, Project Demonstration and Project Reporting.
