

Akif Naseem

ISTQB Certified Tester / SQA at Evolverstech private Limited

03234979804 @ akifnaseem2@gmail.com Lahore, Pakistan

Profile

I am an ISTQB Certified Tester providing my services as SQA Engineer in a Scrum Methodology based organization named as Evolverstech Private Limited. Here I am handling one of their major products, 20 Miles CRM with QA perspective. I perform several testing types in accordance with test object scope but in core ones, Smoke Testing, Functional Testing, UX testing, Confirmation Testing and Regression Testing are included. I perform testing not just to find out the bugs but to nominate those ones early with root causes after thorough root cause analysis. In this way i try to specify a domain of steps so that everyone could easily reach out the nominated bugs during reproduction phase, fix that and deliver the build timely

Projects

20Miles

Project Description:

20 Miles is basically a CRM Based software having thousands of real users. These users use this software in accordance with their business needs and have their own end users. The main purpose is to approach potential customers facing problems to enhance their business, not enough transparency in keeping end users record, and not retaining their active end users for long term. To face such problems 20Miles give one solution with it's highly efficient modules: workflows, buckets, companies, Pipeline, NPS Scoring, Sales view, Reporting and Engage Modules. It's rules engine policies with nowcerts and salesforce integration give it discriminative importance as compared to most of other simple customer management systems.

Gong

Project Description:

Gong is basically a talent nominating platform based on mobile and web application. The main purpose of this project is to gather people no matter what talent the people have and where they live, they can explore their full potential by comparing themselves to others through this platform. Gong competition, Private Competition, Voting, Ranking are its core modules.
